PROJECT

Here are some of my projects...

DAYDREAMING

"Daydreaming" is a short film project that tells the story of an adventure between a little robot girl and a human boy in a post-apocalyptic world.

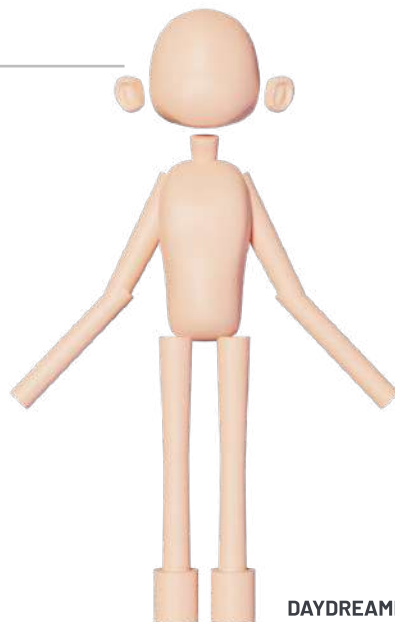

The entire short film was conceptualized, designed, and created using Blender and Substance 3D Painter software.

Hello world

Clay is a childhood toy for every child. From the clay we can make a lot of things even if it's unrealistic.

Below is an image of a set of three posters about clay modeling for children.

Summertime with u

02/
04

The idea is about the lotus seasons in the small village. Where we see the image of pokemon in conical hats rowing on the river.

03/

Orbie from slime cosmos

These are my assignment, created with my classmates, advertising the glowing slime event at school.

04

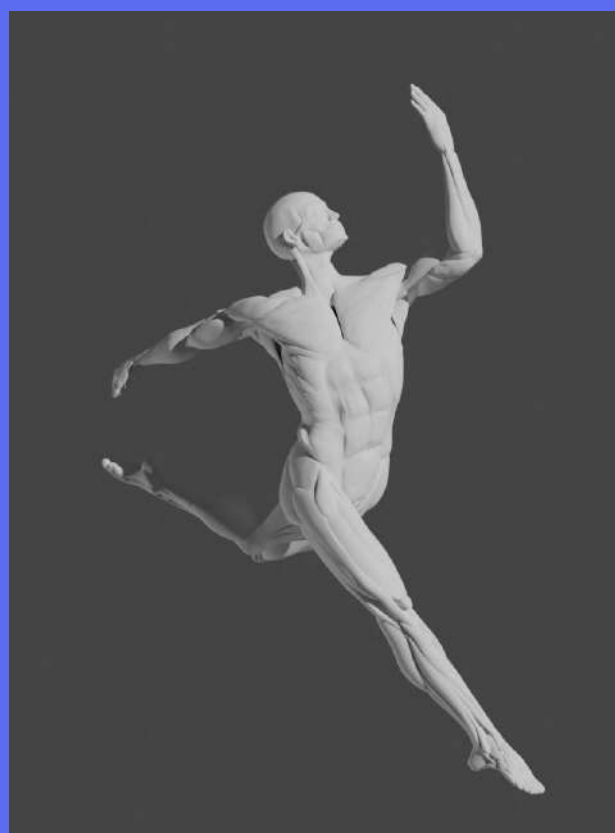

Portrait Weirdo

Some funny portraits I created during extra classes.

ANATOMY LEARNING

02/ Igor Frank

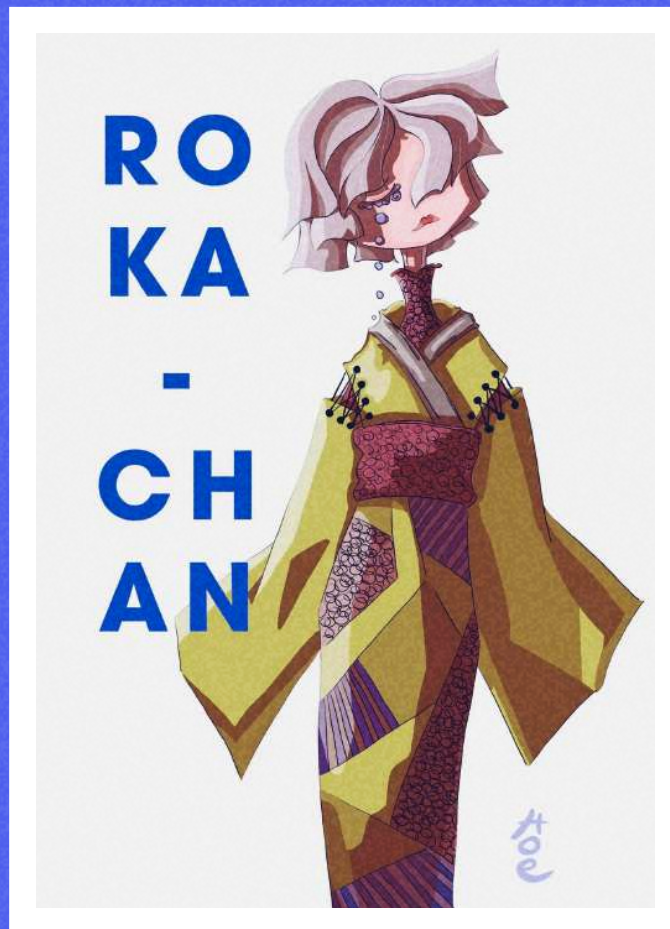

02

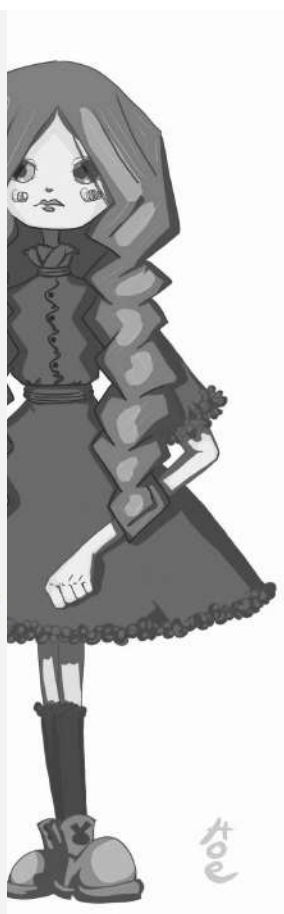

Igor Frank is one of my favorite characters from the game Death Stranding. I like the character's outfit and face.

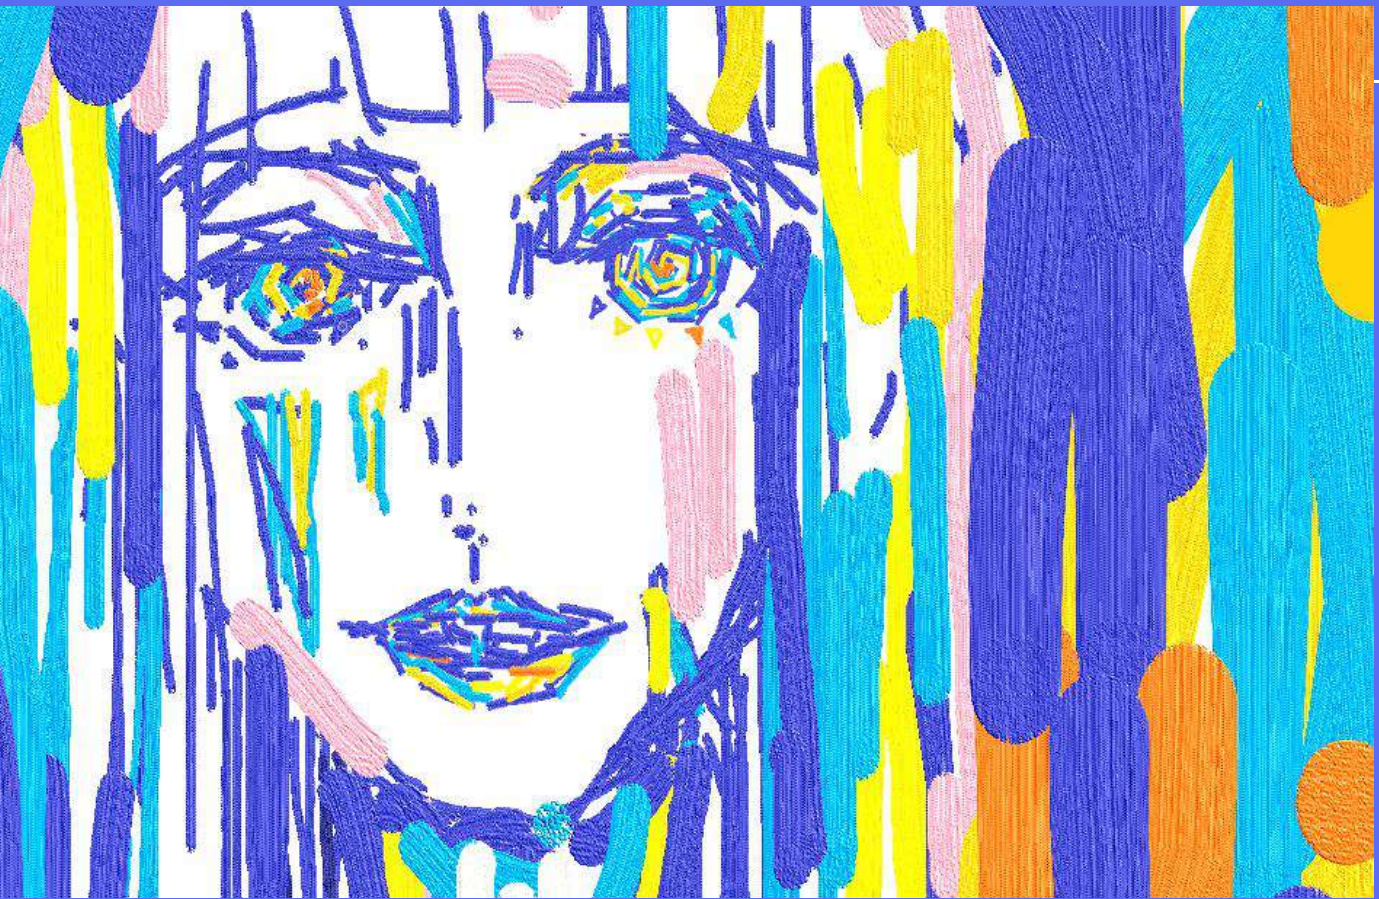

This is also a recent project from my ZBrush learning process. Unfortunately, the work is still incomplete.

LOGO

Buzz là tiếng gọi của chú ong nhỏ đến với hành trình khám phá thế giới của các loài côn trùng. Cùng Buzz, chúng ta được nhìn qua lăng kính đầy sắc màu tươi mới của thế giới tự nhiên và tự mình trở thành những kẻ truy tìm tri thức.
